

Firewall/Filter Settings for MySciLEARN

Scientific Learning provides the following settings for users of the MySciLEARN program who are configuring their firewall or filtering software. We cannot always offer specific instructions on how to configure settings, but questions should be directed to the Support department.

The following ports should be opened:

- 80 and 443

The following IP addresses should be whitelisted:

- IP range of 74.120.252.1 - 74.120.255.254 or
- Network and mask of 74.120.252.0/22 or
- Network 74.120.252.0 and subnet: 255.255.252.0

The following domain names should be whitelisted:

- my.scilearn.com
- www.myscilearn.com
- www.scilearn.com
- content01.scilearn.com
- content02.scilearn.com
- sso.scilearn.com
- ondemand1.scilearn.com
- ondemand2.scilearn.com
- ondemand3.scilearn.com
- ondemand4.scilearn.com
- ondemand5.scilearn.com
- ondemand6.scilearn.com
- fastforword.scilearn.com
- fwd-api.scilearn.com

Scientific Learning might not actively use all IP addresses in the listed ranges, but these addresses might be used and should be configured. As an additional precaution, sites can be added to a web browser as trusted sites.

Some content is delivered through Amazon Web Services. Information on whitelisting and allowing AWS content may be found here.
